How to write the literature review of a technical research paper

What did you write in your introduction section?

- Background
- Problem statement
- Existing work (Briefly)
- Research gap

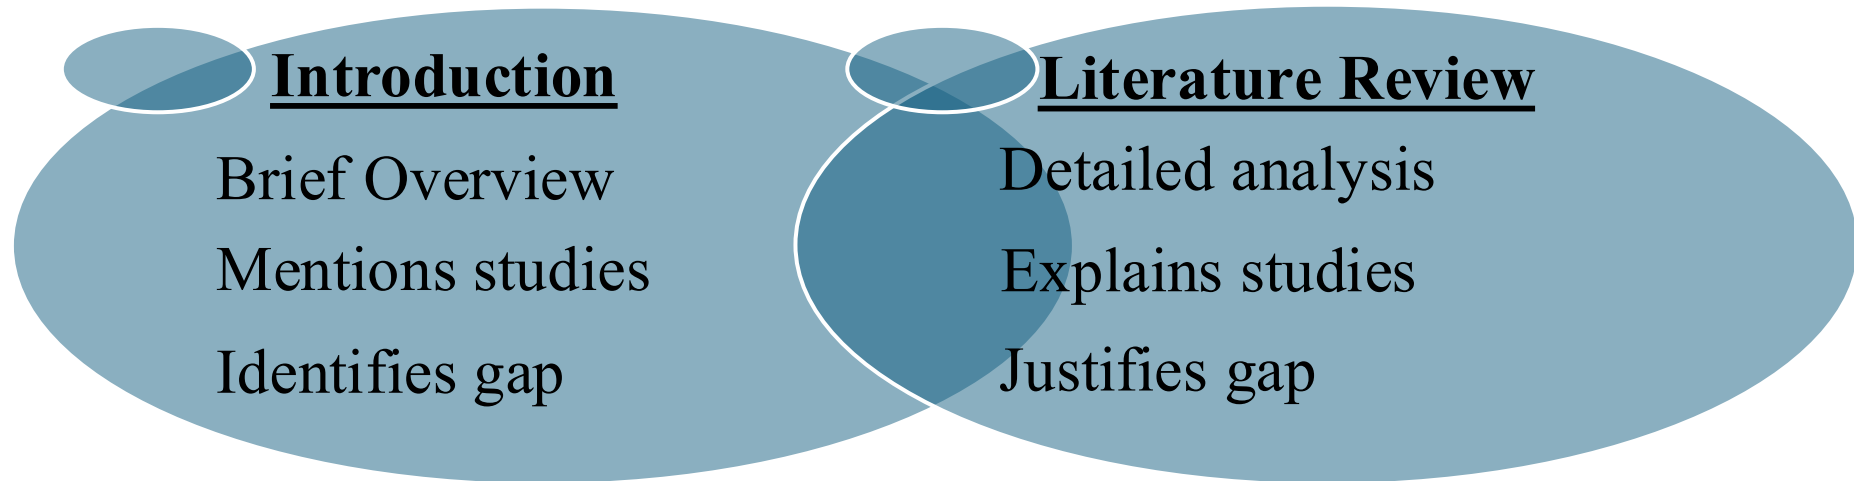

Where did your existing work come from???

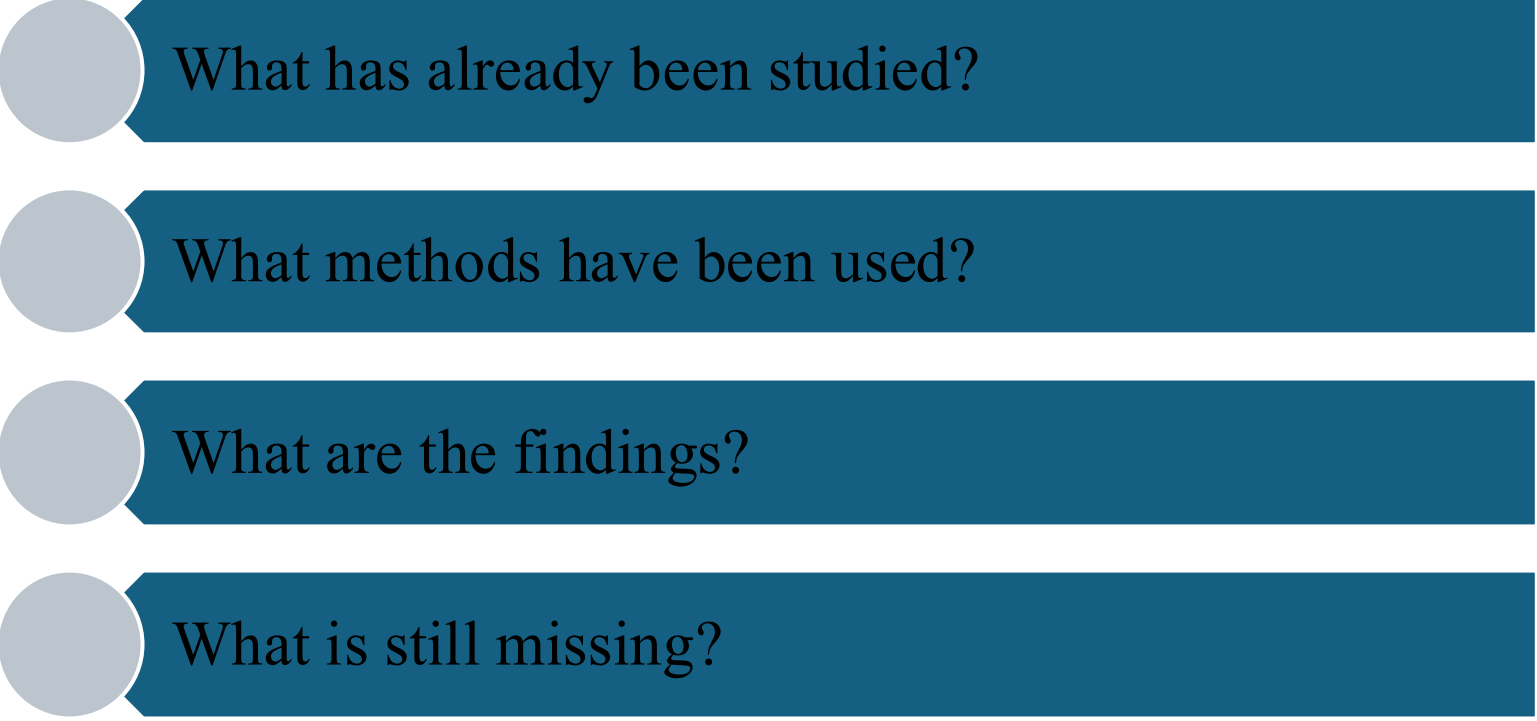

Research Papers

Introduction Vs Literature Review

What is Literature Review?

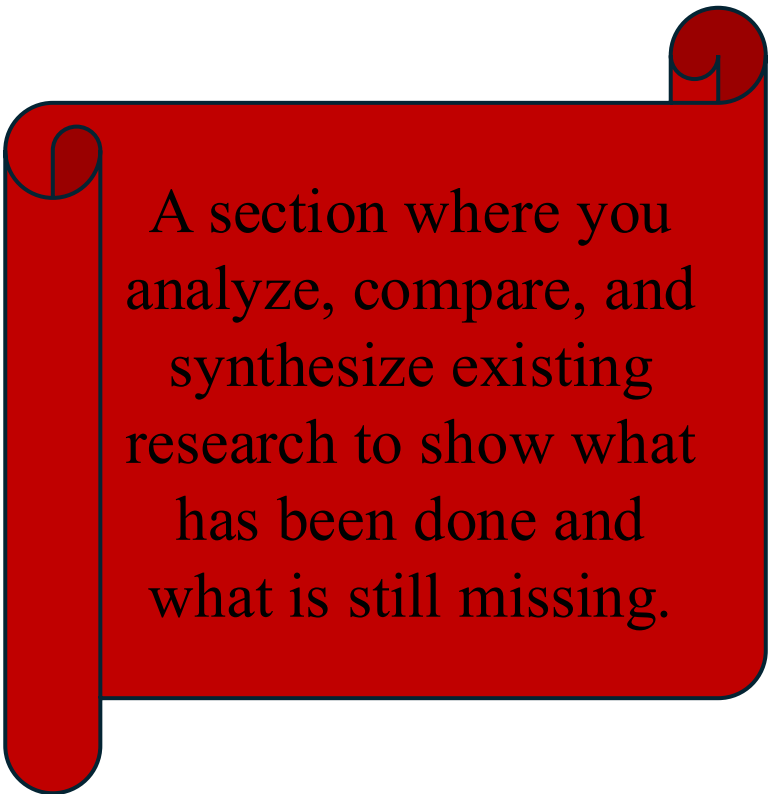

What has already been studied?

What methods have been used?

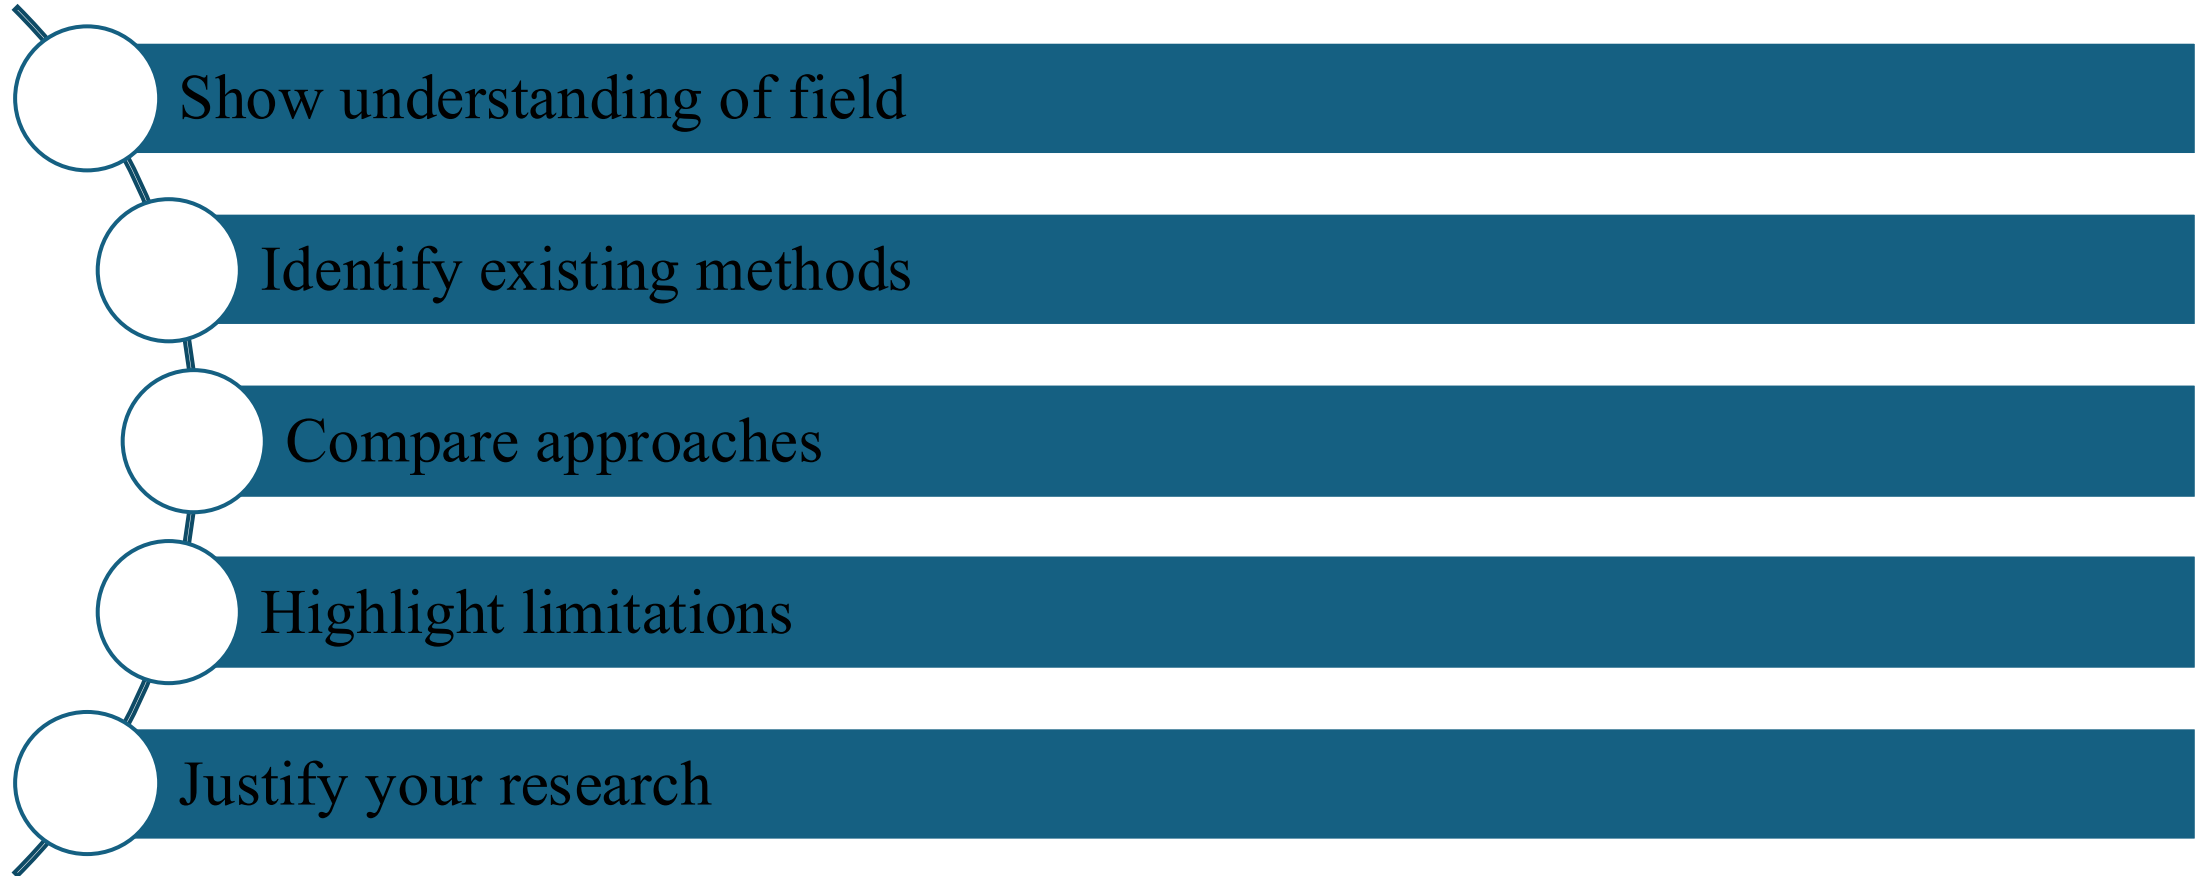

What are the findings?

What is still missing?

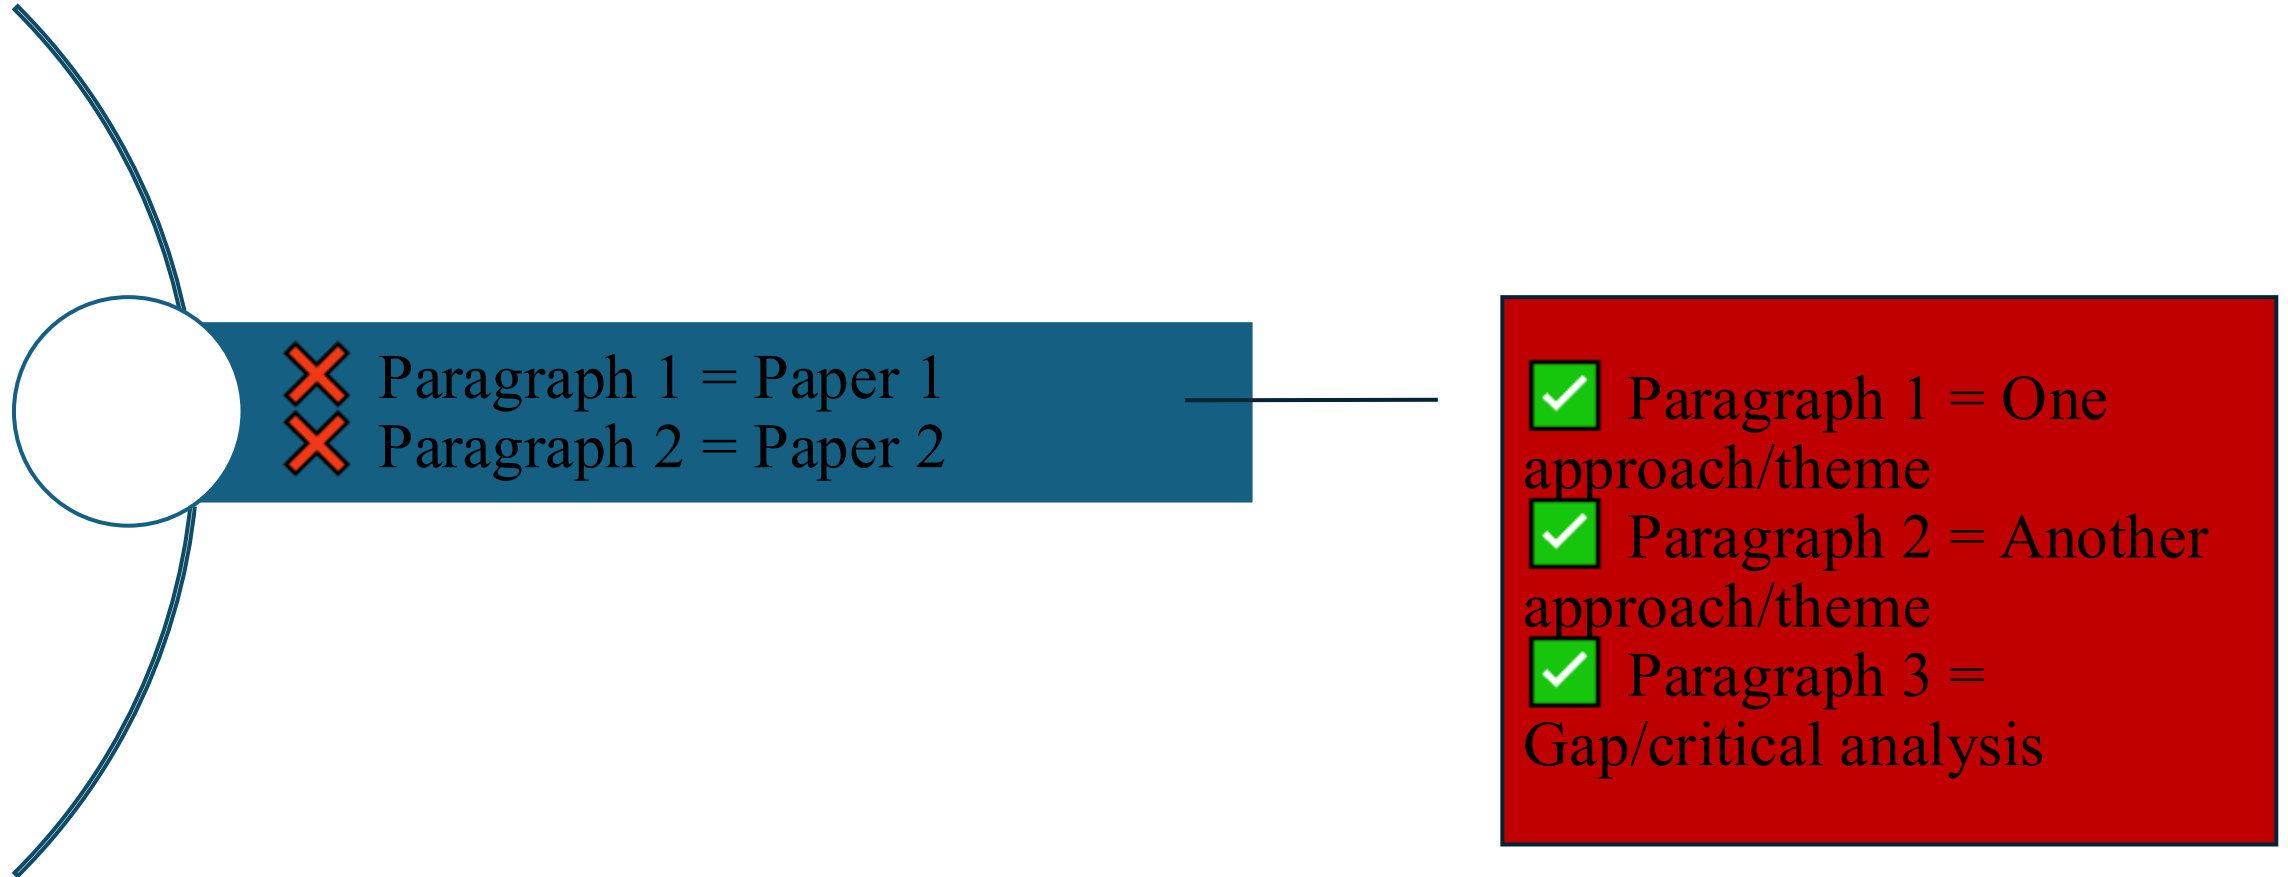

A section where you analyze, compare, and synthesize existing research to show what has been done and what is still missing.

Purpose of literature Review

Divison of paragraphs

How to organize your paragraphs?

In literature review, paragraphs are usually organized by ideas not by papers.

Thematic organization

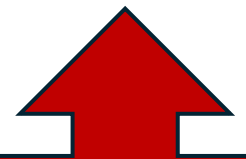

A theme is a common idea, method, or issue across multiple studies.

Topic sentence: What is the theme?
Synthesis + evidence: Support from papers

Conclude the section by:

- Highlighting limitation (what is missing in the existing literature)

Justification of
your research
gap

Helpful sentence patterns:

For synthesis

- Several studies have investigated...
- Recent research focuses on...
- A number of researchers have explored . . .

For comparison

- In contrast to...
- However, unlike...
- While some studies . . . , others . . .

For gap

- However, existing studies do not address . . .
- There is limited research on . . .
- This highlights the need for . . .

Common mistakes

Listing papers one by one

Copy-pasting abstracts

No comparison

No research gap

No. connection to your own study

Your literature review is what justifies your final year project. Without it, your project has no academic value.

Task(s) for attendance

- Task 1: Analyse the elements from sample literature review section of a technical research paper
- Task 2: Expand your introduction section into literature review using relevant papers of your area and domain (use filled table template from last week 8 task)
