

About Technical Reports

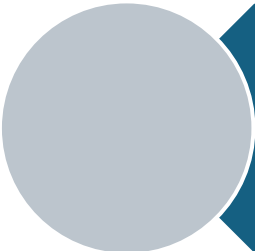

What is a Technical Report?

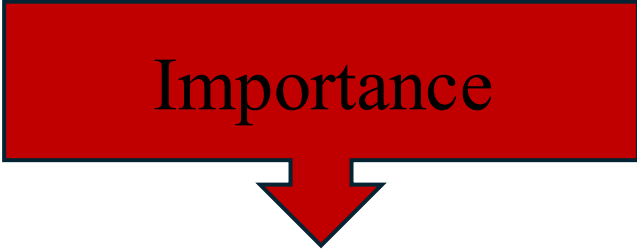

Communicates process,
progress, or results

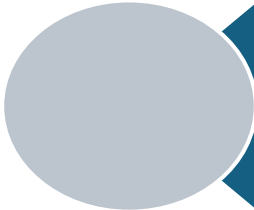

Objective and factual

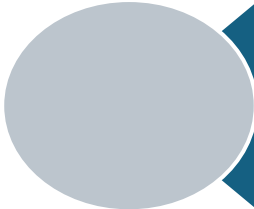

Written for a specific
audience

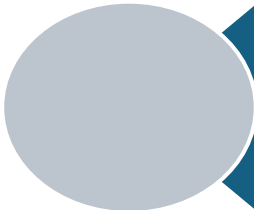

Importance

Supports decision
making

Adds to knowledge

Documents work

Types of Reports

Research Report

- Communicates the results and the procedure of scientific investigation
- Example: AI model performance study

Project Report

- Provides details about a project undertaken to solve a problem
- Example: Mobile app development

Feasibility Report

- Tells whether a project is feasible (practical or financially & technologically possible)
- Example: Should we build this startup app?

Types of Reports

Recommendation Report

- Studies a problem and then makes a recommendation
- Example: Choosing between AWS vs Azure

Lab Report

- Documents lab procedures and their results
- Example: Network simulation results

Progress Report

- Communicated progress on on going projects
- Example: Weekly sprint updates

Structure overview

Cover Materials

- Title Page + Letter of Transmittal + Abstract

Beginning Section

- Introduction: Purpose + Problem + Significance + Scope
- Literature: Existing work + Definitions + Key terms

Body

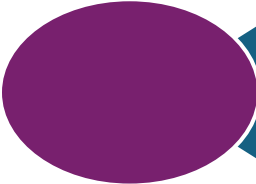

- Methodology + Data Analysis & Results + Discussion

Ending Section

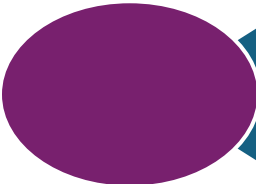

- Conclusion + recommendations + References + Appendix

Cover Materials: Title Page

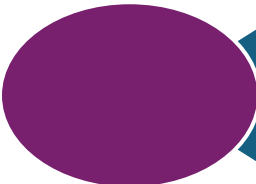

Practice task given in manual
page 63

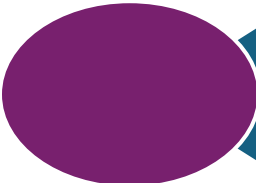

Neat and organized

Clearly indicates the subject title in the upper half of the page

The title of the report should specifically identify both the report's function and subject

The person or organization writing the report and the person or organization receiving the report, the date of submittal appear in the lower half of the page

Cover Material: Transmittal Letter

Addressed to the official who authorized the report and is signed by the official authorized to produce the report.

The title and subject of the report

Can include a summary

Can acknowledge those who assisted in preparing the summary

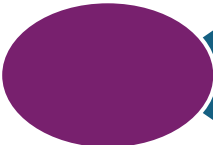

Formal tone

- Official acknowledgment of completion of the report
- Includes a statement of its transmittal

See sample on page 64

Cover Material: Abstract

Practice task given in manual
pages 64-67

Tells about the contents of the report

Gives the gist of contents of the report

Explains problem and how it was studied

Helps the reader to determine whether the report pertains to their interest or not

Standardized word limit of the abstract is 100-250 words.

Two Types of abstract

Informative

- Purpose: To fully summarize the entire report
- Includes: Research Problem + Objectives + Methodology + Key Findings + Conclusions

Mostly Present and Past Tense (because work is completed)

Two Types of abstract

Descriptive

- Purpose: To describe what the report contains, not the results
- Includes: Research Problem + Purpose + Scope + Method (briefly)

Mostly Present + Future Tense

Introduction

Problem

- The specific issue or gap you addresses in your report
- What is not working or missing
- Answers: What is the real-world problem that made you start this project?

Purpose

- The overall aim
- What are you trying to achieve
- Answers: Why are you doing this project?

Significance

- Why the problem matters
- Who benefits and how
- Answers: Why should anyone care about this problem?

Scope & Limitation

- The boundaries of your work
- What is included and what is not included
- Answers: What will your project cover and what will it not cover?

Practice tasks given in manual
pages 49 and 50

Literature

Indicates an awareness of other work relevant to the project (you are working on)

The wider context of the project

Any theory associated with the problem area

Any constraints on the approach to be adopted

Existing solutions relevant to the problem area and why these are insufficient in the context

Methods, tools or techniques that your solution may be based on

Body of the report

Specification & Design

- What exactly are your building and how will it work?
- See sample content on manual page 56

What you planned

Implementation

- Explain what you did

What you built

Results

- Presents what you produced and achieved

What happened

Evaluation/ Discussion

- Interpret and analyze the results

What it means

Ending of the report

Conclusion

- A final summary of your project
- Includes: restate purpose, key findings, overall outcome

Future work/ recommendations

- Suggests what can be improved or done next

References

- A list of all sources cited in the report

Appendix

- Supporting material that is too detailed for the main body
- Includes: questionnaire, interview protocol, raw data, screenshots etc.

Practice tasks given in manual
pages 58- 62

Executive Summary

See samples on manual pages
67-69

What is it?

- A summary for busy administrators and decision makers who will not have time to read the entire report.
- For individuals who lacks the required background

Purpose

- Not just to inform but to help in decision-making
- Helps readers to:
- Quickly understand
- Decide whether to approve/fund/take action for the project

What should it include

- Mini version of the entire report:
- Problem (existing/identifies issue)
- Purpose (You aim)
- Method (How)
- Findings (Your discovery)
- Conclusions
- Recommendations (What should be done next)
- Limitations
