

Technical and Business Writing

Course instructor: Ms. Mariam Aftab

mariam.aftab@nu.edu.pk

A university wants to build a new lab. Should it proceed or not?

How to decide?

Can we do it?

Should we do it?

What will it cost?

What are the risks and benefits?

Feasibility Report

Not describing but
evaluating a project

Feasibility Studies

Writing Feasibility Reports

Feasibility Report

A report that evaluates whether a project is:

- Practical
- Viable
- Worth Implementing

What is it?

Importance

- Prevents failure
- Saves time and cost
- Identifies risks
- Supports funding approval

Why it matters?

Structure of a feasibility Report

Executive Summary

Identified Problem

Proposed Solution

Decision Framework: Feasibility Dimensions

Conclusion

Sections of a Feasibility Report

Executive Summary

A one paragraph summary for decision maker

Project name

What is being proposed?

What problem it solves

Brief feasibility outcome

Context

Purpose

Analysis

Overall conclusion

Problem

Purpose: Why the system is needed

Current issues

Limitations

Real world issues

Current situation

Problem

Impact

Solution

Purpose: Explains what you are building

System idea

Key features

How it solves the problem

Propose solution

What technology

How it is used

Resource Requirements

Identifies what is needed to complete the project successfully

Material

Workforce

Technology systems

Furniture & Operations

Everything needed to build and run the project.

Decision Framework: Feasibility Dimensions

Can it be built with available technology

Do we have the technology, tools, and skills?

Is the system compatible and scalable?

Technical: Can we build it?

Tools + systems + challenges

Can it be funded

Do the benefits outweigh the costs?

Development cost, maintenance, unexpected expenses, profitability

Economic: Is it worth the cost?

Cost + Revenue + Benefits

Decision Framework: Feasibility Dimensions

Can it function in real condition?

Does it fit the organization and user?

User acceptance, management support, business environment

Operational: Will it work in real life?

**Staff+
management+
processes**

Will people and regulations support it?

Does it comply with laws and regulations?

Data privacy, licensing, compliance

Legal: Is it allowed?

**Laws+
compliance+
risks**

Decision Framework: Feasibility Dimensions

Schedule: Can we finish on time?

Phase-based timeline

Conclusion and Recommendation

Purpose: Final Decision

Feasibility Result

Recommendation
