# Writing a survey report

# Where do you encounter surveys in tech or daily digital life?

App feedback forms

User experience

Product reviews

Feedback forms

Surveys transform raw data into meaningful insights

# What is a Survey Report?

A survey report is:

A formal document presenting  
collected data

An objective summary of responses

A tool for decision making

What was found?

What does it mean?

What should be  
done?

# Why survey reports matter?

# Types of Survey Reports

## Employment Satisfaction

Evaluates workplace environment

Identifies employee concerns

## Customer Feedback Survey

Collects feedback or  
products/services

Improves user experiences

# Types of Survey Reports

Market Survey

Identifies customer needs

Supports product development

# Steps to create a Survey Report

# From Data to Decision?

Data: Raw  
numbers

Patterns:  
Trends you  
notice

Insights:  
Explanation

Recommendations:  
Action

# Structure of a Survey Report

Introduction: Purpose + method + audience

Findings: Data + comparisons

Conclusion: Key insights

Recommendations: Actionable steps

# Findings/Result vs Insights

Results

What happened?

60% of users reported slow loading times.

Insights

Why it happened?

System performance issues are negatively affecting user experience.

# Language Features in Survey Report Writing

## Formal and Impersonal Tone

Avoid personal opinions (I, we, you)

Focus on objectivity and neutral tone.

For example:

We think the system is slow

The system is considered slow

# Language Features in Survey Report Writing

## Use of Passive Voice

Emphasize on the results

Common structures:

- It was found that . . .
- It was observed that . . .
- The data was collected . . .

# Language Features in Survey Report Writing

## Reporting Verbs

Use a variety of formal and precise verbs, like:

Suggest, report, indicate, demonstrate, reveal

For example: The results indicate a high level of dissatisfaction.

# Language Features in Survey Report Writing

## Data Expressions

Use exact figures: **70%, 25%, 40% of respondents**

Approximate expressions: **the majority, a significant number, a small proportion**

For example: **The majority of** users reported issue with system speed.
