

Tasksheet Week 15 Day 1: Survey Report

Task I: Rewrite the following sentences in a formal survey report style.

a. We found that students are unhappy with internet speed.	
b. I think most users like the new system.	
c. The survey shows 80% students face login issues. (make it more formal and analytical)	

Task II: Improve the following sentences to make them suitable for a survey report.

a. The users are saying the app is bad.	
b. We saw that many people don't like the system.	

Task III: Match the results in column 1 with its appropriate insight in column 2.

Result	Insight	Answer
a. 62% of users reported delays in accessing course registration pages.	1. The findings suggest that system stability issues, though less common, still affect a notable portion of users.	a.
b. 48% of students found the event booking feature confusing to use.	2. The data indicates that mobile usability requires improvement to support smoother form submission.	b.
c. 37% of respondents experienced difficulties submitting forms via smartphone.	3. The results show that the app is widely used as a primary source for academic information.	c.
d. 73% of students rely on the campus app for checking academic updates.	4. The data reveals that navigation issues in specific features may hinder user experience.	d.
e. 28% of users reported unexpected app shutdowns during use.	5. The findings indicate that system responsiveness is a key concern in accessing essential academic services.	e.

Task IV: You are given survey results from a software system evaluation. Convert each result into a clear insight.

Result	Insight
1. System Performance 60% of users reported slow loading times.	
2. Interface Design 45% of users found the interface difficult to navigate.	
3. Mobile Access 35% of respondents reported issues on mobile devices.	
4. AI Tool Usage 70% of students use AI tools for assignments.	
5. System Stability 25% of users reported frequent system crashes.	

Task V: Select any two insights and write one recommendation for each. Each recommendation must:

Be specific and actionable, clearly address the problem in the insight, and mention what should be done and (if applicable) who should do it
